

Results By running the below code on GPU and CPU

```
[{'label': 'NEGATIVE', 'score': 0.9817990660667419}]  
GPU Time: 1.1983728408813477 seconds
```

```
[{'label': 'NEGATIVE', 'score': 0.9817990660667419}]  
CPU Time: 5.441520929336548 seconds
```

COMPARISON TABLE

Runtime	Time Taken
GPU	1.19 seconds
CPU	5.44 seconds

CONCLUSION

It was observed that GPU-based inference was significantly faster than CPU-based inference due to parallel processing capabilities. However, the output generated by the model remained consistent in both environments.
